

Simplifying Implant Billing – by Color and Code (update 2021)

Implant supported –Attaches to implant body directly

D6065-67 D6082-8	D6075-77 D6205-53	D6055, D6192 D6110-13	D6055, D6192 D6114-19	Restorative codes
Crown	Bridge	Denture Removable	Denture Fixed	

Abutment supported –Attaches to abutment which is attached to the Implant body

D6058-64 D6094, 97, 98 D6085	D6068-74 D6194, 95 D6205-53	D6055 D6110-19	D6055 D6114-19	Restorative codes
Crown	Bridge	Denture Removable	Denture Fixed	
D6051, D6056, D6057, D6191				Abutment codes

Surgical Codes

D6010 Surgical placement of implant body: endosteal implant

D6011 Second stage implant surgery – Removal of tissue for placement or replacement of fixture or to shape/contour gingiva.

D6012 Surgical placement of interim implant body for transitional prosthesis: endosteal implant – Includes removal during later therapy to accommodate the definitive restoration, which may include placement of other implants

D6013 Surgical placement of mini implant

D6040 Surgical placement: eposteal implant - An eposteal (subperiosteal) framework of a bio-compatible material designed and fabricated to fit on the surface of the bone of the mandible or maxilla with permucosal extensions which provide support and attachment of a prosthesis. This may be a complete arch or unilateral appliance. Eposteal implants rest upon the bone and under the periosteum

D6050 Surgical placement: transosteal implant – A transosteal (transosseous) biocompatible device with threaded posts penetrating both the superior and inferior cortical bone plates of the mandibular symphysis and exiting through the permucosa providing support and attachment for a dental prosthesis. Transosteal implants are placed completely through the bone and into the oral cavity from extraoral or intraoral.

D6100 Implant removal, by report – This procedure involves the surgical removal of an implant.

D6101 Debridement of a peri-implant defect or defects surrounding a single implant, and surface cleaning of the exposed implant surfaces, including flap entry and closure

D6102 Debridement and osseous contouring of a peri-implant defect or defects surrounding a single implant and includes surface cleaning of the exposed implant surfaces, including flap entry and closure

D6103 Bone graft for repair of peri-implant defect – does not include flap entry and closure. Placement of a barrier membrane or biologic materials to aid in osseous regeneration are reported separately

D6104 Bone graft at time of implant placement – Placement of a barrier membrane, or biologic materials to aid in osseous regeneration are reported separately.

Implant Billing Codes - Miscellaneous

D6080 Implant maintenance procedures, when prosthesis are removed and reinserted, including cleansing of prostheses and abutments

D6081 Scaling and debridement in the presence of inflammation or mucositis of a single implant, including the cleaning of the implant surfaces, without flap entry and closure – not performed in conjunctions with D1110 or D4910

D6090 Repair implant supported prosthesis by report

D6091 Replacement of a replaceable part of a semi-precision or precision attachment (male or female component) of implant/abutment supported prosthesis, per attachment

D6092 Re-cement or re-bond implant/abutment supported crown

D6093 Re-cement or re-bond implant/abutment supported fixed partial denture

D6095 Repair implant abutment, by report

D6096 Remove broke implant retaining screw

D6199 Unspecified implant procedure, by report – use for procedure that is not adequately described by a code

D6085 Provisional implant crown – when a period of healing is necessary prior to fabrication and placement permanent prosthetic

The following are codes for the abutments

D6191 Semi-precision abutment – placement or replacement of semi-precision attachment to implant body

D6056 Prefabricated abutment – includes modification and placement

D6057 Custom fabricated abutment – includes placement – created by a laboratory process, specific for an individual application

D6051 Interim Abutment – includes placement and removal. A healing cap is not an interim abutment

The following are codes used for **implant supported** cases where it directly attached to the implant (e.g. screw retained crown - Charge for the crown(s) or retainer(s) only)

D6065 Implant supported porcelain/ceramic crown	(for Crowns)
D6066 Implant supported crown - porcelain fused to high noble metal	(for Crowns)
D6067 Implant supported crown - high noble metal	(for Crowns)
D6082 Implant supported crown - porcelain fused to predominantly base metal alloys	(for Crowns)
D6083 Implant supported crown - porcelain fused to noble metal	(for Crowns)
D6084 Implant supported crown - porcelain fused to titanium and titanium alloys	(for Crowns)
D6086 Implant supported crown – predominantly base metal alloys	(for Crowns)
D6087 Implant supported crown - Noble alloys	(for Crowns)
D6088 Implant supported crown – titanium and titanium alloys	(for Crowns)
D6075 Implant supported retainer for ceramic FPD	(for Bridges)
D6076 Implant supported retainer for FPD (porcelain fused to high noble metal)	(for Bridges)
D6077 Implant supported retainer for metal FPD (high noble metal)	(for Bridges)
D6098 Implant supported retainer for FPD (porcelain fused to predominantly base alloys)	(for Bridges)
D6099 Implant supported retainer for FPD (porcelain fused to noble alloys)	(for Bridges)
D6120 Implant supported retainer for FPD (porcelain fused to titanium and titanium alloys)	(for Bridges)
D6121 Implant supported retainer for metal FPD (predominantly base alloys)	(for Bridges)
D6122 Implant supported retainer for metal FPD (Noble base alloys)	(for Bridges)
D6123 Implant supported retainer for metal FPD (Titanium and titanium alloys)	(for Bridges)

The following are codes used for the **abutment supported** cases (e.g. cement retained crown - Charge for abutment **and** the crown(s) or retainer(s))

D6058 Abutment supported porcelain/ceramic crown	(for Crowns)
D6059 Abutment supported porcelain fused to metal crown (high noble metal)	(for Crowns)
D6060 Abutment supported porcelain fused to metal crown (predominantly base metal)	(for Crowns)
D6061 Abutment supported porcelain fused to metal crown (noble metal)	(for Crowns)
D6062 Abutment supported cast metal crown (high noble metal)	(for Crowns)
D6063 Abutment supported cast metal crown (predominantly base metal)	(for Crowns)
D6064 Abutment supported cast metal crown (noble metal)	(for Crowns)
D6085 Provisional implant crown – when healing is necessary prior to fabrication and placement permanent prosthetic	(for Crowns)
D6094 Abutment supported crown – titanium and titanium alloys	(for Crowns)
D6097 Abutment supported crown – Porcelain fused to titanium and titanium alloys	(for Crowns)
D6068 Abutment supported retainer for porcelain/ceramic FPD	(for Bridges)
D6069 Abutment supported retainer for porcelain fused to metal FPD (high noble metal)	(for Bridges)
D6070 Abutment supported retainer for porcelain fused to metal FPD (predominantly base metal)	(for Bridges)
D6071 Abutment supported retainer for porcelain fused to metal FPD (noble metal)	(for Bridges)
D6072 Abutment supported retainer for metal FPD (high noble metal)	(for Bridges)
D6073 Abutment supported retainer for metal FPD (predominantly base metal)	(for Bridges)
D6074 Abutment supported retainer for metal FPD (noble metal)	(for Bridges)
D6194 Abutment supported retainer for metal FPD - (titanium)	(for Bridges)
D6195 Abutment supported retainer for porcelain fused to metal FPD (Titanium and titanium alloys)	(for Bridges)
D6205-D6253 – for <u>pontics</u> , depending on material used, similar to conventional crown & bridge	(for Bridges)

The following are codes are used for implant/abutments supported Removable Dentures (Full or Partial)

D6055 Connecting bar – implant or abutment supported– used to stabilize and anchor a prosthesis	(for Dentures)
D6110 Implant/abutment supported removable denture for edentulous arch – maxillary	(for Dentures)
D6111 Implant/abutment supported removable denture for edentulous arch – mandibular	(for Dentures)
D6112 Implant/abutment supported removable denture for partially edentulous arch – maxillary	(for Dentures)
D6113 Implant/abutment supported removable denture for partially edentulous arch – mandibular	(for Dentures)
D6192 Semi-precision attachment – placement or replacement of semi-precision attachment to removable prosthesis	(for Dentures)

The following are codes used for implant/abutment supported Fixed Dentures (Hybrid Prosthesis)

D6114 Implant/abutment supported fixed denture for edentulous arch – maxillary	(for Dentures)
D6115 Implant/abutment supported fixed denture for edentulous arch – mandibular	(for Dentures)
D6116 Implant/abutment supported fixed denture for partially edentulous arch – maxillary	(for Dentures)
D6117 Implant/abutment supported fixed denture for partially edentulous arch – mandibular	(for Dentures)
D6118 Implant/abutment supported interim fixed denture for edentulous arch – mandibular	(for Dentures)
D6119 Implant/abutment supported interim fixed denture for edentulous arch – maxillary	(for Dentures)
D6192 Semi-precision attachment – placement or replacement of semi-precision attachment to removable prosthesis	(for Dentures)
