IMPLANT CODING GUIDE FOR IMPLANT SUPPORTED REMOVABLE OVERDENTURE AND IMPLANT RETAINED FIXED DENTURE (ALL ON FOUR)

Implant-Supported Dentures (removable)

Implant Supported Removable Denture (overdenture)	
Implant Supported Denture, which is the common two implant supported overdenture. The overdenture is REMOVABLE by the patient. Completing the implant supported overdenture typically involves	
1. Placement of two (or more) implants	D6010
2. Placement of healing collars to allow tissue to heal included with implant placement	fee
3. Placement of semi-precision abutment per implant	D6191 per implant
4. Fabrication (or conversion) of the denture	D6110 or D6111
5. Luting the receiver semi-precision attachment to the denture per implant	D6192

Abutment	**Most Common Codes:** **D6191 Semi – precision abutment. (Code each abutment)**
Receiver	**Most Common Codes:** **D6192 Semi – precision attachment. (Code per implant)** *NOTE: This is the component either doctor or lab lutes to the Denture for the abutment to attach it. You use both codes for each Implant supporting the denture*

Denture

Most Common Codes:

D6110
Maxillary denture

6111
Mandibular denture

Example: Restoring doc and implants placed by your surgeon. Two implant supported mandibular overdenture. Implants #22 and #27

> *#22 D6191* Semi – precision abutment
> *#22 D6192* Semi – precision attachment
> *#27 D6191* Semi – precision abutment
> *#27 D6192* Semi – precision attachment
>   *D6111* Mandibular denture

IMPLANT CODING GUIDE FOR IMPLANT SUPPORTED REMOVABLE OVERDENTURE AND IMPLANT RETAINED FIXED DENTURE (ALL ON FOUR)

Implant-Retained Dentures

Implant Retained Fixed Denture (All on Four) Attached to implants.	

Denture fixed in place with screws to inter-connecting abutments.
 	
Completing an ALL on Four case typically involves
    1. an Interim Denture screwed in place on the day of surgery by the surgeon and assisted by a lab tech
    2. then a definitive denture is fabricated after complete healing
 	
At the time of surgery, code the implant placements, inter-connecting abutments and the interim denture. *Typically, the surgeon codes for the implants and abutments and the restoring doctor codes for the interim denture and final denture.*	

Procedure Codes	**Most Common Codes:** **D6010** (Code for each implant) **D6056** stock abutment (Code for each abutment) **D5810** Maxillary Interim Denture or **D5820** Mandibular Denture **D6114** Maxillary Fixed Denture or **D6115** Mandibular Fixed Denture

Day of Surgery Codes (surgeon)	Restoring Doctor Codes
Most Common Codes: **D6010** For each implant **D6056** Stock abutment (Code for each abutment)	**Most Common Codes:** **D5810** Maxillary Interim Denture or **D5820** Mandibular Denture **D6114** Maxillary Fixed Denture or **D6115** Mandibular Fixed Denture
